Quiz 2.1

1. What is a device driver?

2. Name three device drivers your team has been asked to create for the Train Control Computer.

3. What is a cross compiler, and for what purpose have we used one this semester?

4. In the ATmega328P datasheet, it lists two different addresses for every register (e.g. PORT B’s address is listed as “0x05 (0x25)”). Why?
