Group Final Report
CS 3120 User Interface Design

Due: Final Session - 12/10/2018

This assignment should be compiled and submitted as a group in class or via email.

Project Report
Deliverables to submit on your project

1. Description of your final design.
   a. The original task analysis.
   b. Written wrap-up of how well your current design meets these task needs.
   c. Written wrap-up of what features were not included in the original functionality, and how or why they were identified and added.
   d. Written wrap-up of what the team feels that still needs to be changed or enhanced in your design.

2. Copy of your prototype.
   This may include printouts of all of your screens.
   Mappings or storyboards of how the screens are linked together.

3. Anything other documentation that may be helpful for understanding your project.
