

11/01/2011

7. At the end of the show automatically navigate to a web page of your own creation on sunny.uni.edu web site.

8. Web page navigated to will be specified in future handout — will involve Photoshop and Dreamweaver.

Flash assignment:

1. Choose 4 images of whatever you wish to showcase. They can be your photographs, screen snapshots, t-shirts, whatever you wish. Your own creations are okay too.

2. The 4 images must be the same size, or at least the same proportions. Use Photoshop to CROP, if needed.

3. For communication purposes, let's call these images i1, i2, i3, and i4. They will be used for a Flash intro. Each image will have at least 3 phases:

a. It's 1st Keyframe to 2nd KF. Twirl it in CW rotation as it

b. It's 2nd KF to 3rd KF. alpha, scales same size. it stays 40.

c. It's 3rd KF to 4th KF it twirls out, scales down to smaller size, and disappears (opacity or Alpha: 100% to 0%)

Summary of CLASSIC TWEENING
Rotation, size (scale) changes, Alpha changes.

All four play but
height = $\frac{h}{2}$
width = $\frac{w}{2}$

These can be simultaneous, or slightly staggered — just so you see all 4 at once.

4. The last KF of the actions layer for each symbol i1, i2, i3, and i4 will have a stop(), so it does not play again.

5. Sequence:

i1 plays and completely disappears, then i2 plays, disappears, then i3 plays, fades out, and finally i4 plays and disappears.

6. Next phase:
