VIP: Please notify in advance by email or after class whenever possible! Appointments are best and can also be arranged almost anytime outside of office hours and on weekends too.

Fall 2010 class schedule: 9:00 MWF; 11 MWF; 11 TTh

Textbook: Adobe Flash CS4 Professional Digital Classroom – includes DVD.
By Fred Gerantabee and the AGI Creative Team

Grading on exams, homework and quizzes.

1. There will be two midterm exam. The midterm tests will be each be worth around 12.5% of your grade. The two exams will count for about 25% of your grade. The 1st exam will be on Tuesday, October 5th. The 2nd exam will be held on Thursday, November 18th.

2. The final exam will be held on Thursday, December 16th from 10–11:50 am. It constitutes about 25% of your grade in the course. The final exam may be held in two parts. If so, the 1st part would be in the classroom and would be a paper and pencil traditional exam. The 2nd part would be hands-on in a computer lab. If it is not a two–part exam, it would be the traditional 2–hour long final exam in the classroom.

3. The laboratory sessions and class participation/citizenship/attendance will count for 10% of your grade.

4. The homework assignments and projects will be worth 40% of the total grade. Some of the homework assignments will be completed and checked off in the lab.

Miscellaneous topics:

- Any student who requires some modification of seating, testing, or other class requirements should speak with the instructor at the beginning of the semester.
- When sending email, sign with your first name at the end of the note. This is VIP!
- Feel free to leave early for an appointment or whatever as that is never a problem but it is always nice to be told before class starts.
- The four classes 810:021, 810:022, 810:023 and 810:030 give you microcomputer certification from the computer science department. 12 hours of credits is required.
- 810:088 (Topics in Computing: Maya 3D Graphics) also counts for certification. It will be offered again in spring of 2011. It can be substituted for 810:021 or 810:023 or taken as an extra class in addition to the 021, 022, 023 and 030 certification classes. It can be repeated as a different topic.
- 810:088 Topics in Computing: Visual Effects, Animation, and Motion Graphics will likely be offered again next semester, i.e. in the spring of 2011. The class was offered for the first time during the summer of 2009, and so far both spring semester and fall semester in 2010. 810:088 Topics in Computing: Maya 3D Graphics is likely to be offered again in the fall of 2011.
- ITT 136 is on the 2nd floor of the ITT building. It is also called StudioIT 2. We may occasionally get switched to StudioIT 1, which is right next door.
