

1. What is the specific keyboard shortcut for **trimming** the beginning of or **start** of the Tulip5 layer to be where the CTI currently is positioned? (See the following screen snapshot). *The TULIP layer is just a JPG (JPEG) graphic and NOT a movie.*

2. What does the keyboard shortcut **control+K** do in Flash?
3. What are the **names** of the **FOUR STATES** for a button symbol in Flash?

4. What is the name of the menu choice that you choose from this Output Module drop-down menu every time we render for our class. The answer is NOT FLV, by the way!
