1. What is required if you wish to successfully make a MASK PATH (a mask) when using the SHAPE tools such as oval or rectangles or the pen tool to draw or lay down the mask path? (Hint: this is a very common error to forget what is required).
2. What does the keyboard shortcut **control+K** do in Flash?
3. What are the names of the FOUR STATES for a button symbol in Flash?
4. What are the 3 types of Symbols that you can create using Flash? Each type has a name. I want the name of each type here. This is NOT an essay question!
