CSED 1320
Fundamentals of Programming
Fall 2021

General Information
Time and Place: T/Th, 3:30-4:45, Begeman 301
Class Website: http://www.cs.uni.edu/~schafer/1320/
Credit Hours: Three (3). This course meets the Course Credit Hour Expectation outlined in the Course Catalog.
Instructor: Dr. Ben Schafer (schafer@cs.uni.edu)

Student Hours:
I have decided that, by default, I will hold all student hours by appointment and online unless we have made special arrangements prior to the meeting. To begin with, I have made multiple sessions available each week.
- MWF 10-11 AM
- T/Th 9:30-11:00 AM
- T/Th 2:00-3:00 PM

In order to meet with me during one of these time slots you should first set up an appointment using my online calendar.

Then at the appropriate time, you can log on to the following Zoom room:
- https://uni.zoom.us/j/3192732187 [The password for this room is simply the three letter acronym our campus]

If those times don't work for you, or you feel the need to meet with me face-to-face, PLEASE, send me an email and propose a specific alternative. I want to meet with you at a time/place that is best for both of us and am very willing to work things out.

Course Information
Course Description
Introduction to computer programming through a survey of programming environments used by teachers. Topics include structure of programming, study of several programming environments used by students at a variety of age/ability levels, and end-user programming for teachers.

Student Learning Outcomes
By the end of this semester students taking this course should be able to meet the following objectives:

Programming Oriented Outcomes. Students should be able to:
- trace a segment of code to determine the result produced or state achieved by given code
- modify a provided piece of code to accomplish a given task
- choose and sequence action statements to accomplish a given task
- develop and use selection statements (if-then, if-then-else, etc.) to control selection between actions
- develop and use iteration statements (for, while) to control repetition of actions
- explain the concepts of sequence, loops, parallelism, events, conditionals, operators, variables, and lists within the context of computer science.
Teaching Oriented Outcomes. Students should be able to:

- explain the concepts of sequence, loops, parallelism, events, conditionals, operators, variables, and lists within the context of a K-12 classroom.

Classroom Structure

Textbook
No single textbook fits our needs. Instead, all required readings and other materials will be selected from legally available resources on the internet or from instructor produced materials.

Computer Use
Students in this course will rely heavily on the use of the computer. All of the learning materials and programming environments for this course are available from any computer with a web browser and internet access. You will need access to a computer with Internet access while off campus and when in the classroom. If you do not have access to a device for daily use, please reach out to me and we will see what we can do to get you access to one of the limited number of laptops available for student use. [Recognize that these are shared among students and you should use caution when using them both for your physical and cyber safety.]

Classroom Interactions
We are faced with yet another challenging school year. We had really hoped that we could come in to this school year, more or less, as business as usual. However, Covid – in particular the Delta variant – is still a real and legitimate problem. Our understanding of the science has changed and will continue to change. By extension, the CDC, federal, state, and campus guidelines continue to be an evolving work in progress. I ask that we all do our part to be patient, understanding, and cooperative.

Teaching and learning during this pandemic has been hard. I am a firm believer in the power of collaborative, peer-based learning. I really do believe that you learn much more if you are actively engaged with the material vs. simply listening to me tell you about the material. Because of this, I will likely ask you to collaborate in class frequently this semester. In fact, I will be using a technique called Process-Oriented Guided Inquiry Learning or POGIL almost every week that will involve having you spend 20-45 minutes at a time working in a group of 3-4 students.

I very truly do not want to make you uncomfortable. If you are placed in a classroom situation where you are uncomfortable due to health concerns, I will ask you to PLEASE bring it to my attention. I will do everything reasonable to accommodate your situation. Nonetheless, this whole situation will be better if we all are cooperative. Many of us are vaccinated and I believe that is a good and helpful thing. If you aren't vaccinated yet, I ask you to give it serious and scientific consideration. However, given the current evidence I will strongly encourage you, even if vaccinated, to wear a mask in social situations such as our classroom. The science really does suggest that proper usage of masks is safe and effective.

Course Grading
I use a grading system drawn from the philosophies of "standards-based grading" and "equitable grading" (https://gradingforequity.org/). The main idea is that I WANT you to succeed in the course by giving you multiple opportunities for you to show me that you have learned the necessary material. In most cases, if you can't do this the first time you will be able to re-study and try again.
You will earn multiple "grades" in this course. Each of these is a category of understanding that, for simplicity, is recorded as a score from 1-4 with the following meaning:

<table>
<thead>
<tr>
<th>Score</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>You submitted the deliverables or attempted the activity but you show little understanding of the standards of the activity. [NOTE, you cannot pass this course (grade of C or higher) with any 1s in your grades]</td>
</tr>
<tr>
<td>2</td>
<td>You have made significant progress towards demonstrating competency but there are limited items that remain unsatisfied.</td>
</tr>
<tr>
<td>3</td>
<td>You have &quot;met&quot; the standards of the activity. [You have displayed minimum acceptable competency on this activity.]</td>
</tr>
</tbody>
</table>
| 4     | You have "exceeded" the standards of the activity. [You have met the standards of competency and shown considerable understanding/knowledge of the material.]

You will complete three different types of activities this semester.

- **Ungraded "Practice Problems"
  - We will do a lot of activities, both in class and as "homework," that are completed as a way to enhance your learning. In most cases, it is the process that I am after rather than the results.
  - In order to give you feedback on your understanding of the material and your ability to solve these problems, you will submit them to Autolab for process. Officially, these are not part of your overall grade.
- **3 Unit "Problem Set" Grades
  - The course is divided unto 3 units. Each of these units will contain a series of "Problem Sets" which are graded programming assignments.
  - Each unit is graded independently based on activity specifications and an outcomes evaluation table published separately for each unit.
  - All in-unit activities [programming assignments] may be submitted multiple times up to the unit deadline.
- **5 Competency Demos (CD)
  - You can think of these like exams.
  - Each will be administered in-class via Blackboard and/or Autolab (using Python)
  - For CDs 1-4, if you do not like the grade you earned on the original CD, you will be provided an opportunity to ask questions, re-study the material, and attempt a second CD to improve your grade. Details on this will be provided when it becomes an option.
  - The Final CD will be administered during the university scheduled exam period on Thursday, December 9th from 3:00-4:50.
    - This is the only activity all semester for which you will not be given an opportunity to improve your grade.
At the end of the semester you will have earned multiple (8?) course grades. Your final grade will be determined using the following evaluation criteria.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>All scores are 3 or 4 AND more 4s than 3s</td>
</tr>
<tr>
<td>B</td>
<td>All scores are 3 or 4 OR No more than one score of 2 AND an overall average of 3.25 or higher</td>
</tr>
<tr>
<td>C</td>
<td>No more than two scores of 2 AND an overall average of 3.00 or higher</td>
</tr>
<tr>
<td>D</td>
<td>More (3s and 4s) than (1s and 2s).</td>
</tr>
<tr>
<td>F</td>
<td>Any situation not handled above.</td>
</tr>
</tbody>
</table>

In most situations, grades earned are straight letter grades – no plusses or minuses. Because you have multiple opportunities to retake and earn better grades this isn't as rough as it might sound. However, I DO reserve the right to raise grades slightly (take a B grade to a B+) if I feel there are specific and individual circumstances that warrant this change from the above criteria.

Please note, in an effort to be responsive to your needs I reserve the right to modify the structure of this course as we are in progress. If there is significant deviation from the policies described below, this new policy will be clearly discussed with you and in a timeframe that gives you a time to plan accordingly.

**Getting Help**

If you are having trouble with a topic in the class PLEASE make an effort to reach out to me early. Do not wait until the situation is out of control. I am VERY willing to help. However, I have to know you want and need help.

**Additional Policies and Statements**

**Scholastic Conduct**

You are responsible for being familiar with the University’s Academic Ethics Policies:

[https://www.uni.edu/policies/301](https://www.uni.edu/policies/301)

Copying from other students is expressly forbidden. Doing so on CDs will be penalized every time it is discovered. The penalty can vary from zero credit for the copied items (first offense) up to a failing grade for the course. If an assignment makes you realize you do not understand the material, ask a fellow student a question designed to improve your understanding, not one designed to get the assignment done. Your final submission for assignments should be individual, original work unless otherwise specified. Any substantive contribution to your solution by another person or taken from a publication should be properly acknowledged in writing. Failure to do so is plagiarism and will necessitate disciplinary action. In addition to the activities we can all agree are cheating (plagiarism, bringing notes to a closed book exam, etc), assisting or collaborating on cheating is cheating. Cheating can result in failing the course and/or more severe disciplinary actions. Remember: Discussing assignments is good. Copying code or answers is not.
Accessibility
The University of Northern Iowa (UNI) complies with the Americans with Disabilities Act Amendments Act of 2008 (ADAAA), Section 504 of the Rehabilitation Act of 1973, the Fair Housing Act, and other applicable federal and state laws and regulations that prohibit discrimination on the basis of disability. Students with disabilities experiencing a barrier to access should connect with Student Accessibility Services (SAS) to request accommodations. For more information about the accommodation process, please contact SAS at (319) 273-2677 Relay 711, accessibilityservices@uni.edu, or GIL 118. Additional information is also available at sas.uni.edu.

The Learning Center
The Learning Center @ Rod Library provides free tutoring for a variety of different areas (i.e. writing, math, science, business, Spanish, college reading and learning strategies). The Learning Center @ Rod Library is open for walk-in assistance Monday-Thursday 10am-10pm and is free of charge for all UNI students. If you are unavailable during normal tutoring hours, online tutoring is also available through Smarthinking. You will need your CATID and passphrase to gain access. To access the Smarthinking platform go to https://tlc.uni.edu/online. For more information, go to https://tlc.uni.edu, email TheLearningCenter@uni.edu, call 319-273-6023, or visit the TLC desk located on the main floor of Rod Library.

Free Speech
The University of Northern Iowa supports and upholds the First Amendment protection of freedom of speech and the principles of academic and artistic freedom. We encourage the free and responsible exchange of diverse ideas on our campus. The University is committed to open inquiry and the spirited and thoughtful debate of such ideas.

Absences related to COVID-19 illness, self-isolation, or quarantine.
Faculty must be prepared to have assignment alternatives for individual students who are unable to attend class due to COVID-related health issues. To utilize these alternative assignments, students must report the issue by completing the Panther Health Survey; students directed not to come to campus or who are unable to participate in class due to COVID-19 related illness, self-isolation, or quarantine should utilize the information provided in the survey to have their faculty notified of their need to be absent. These same instruction/assignment alternatives should also extend to field experiences that students may not be able to attend for the same reasons. Questions related to COVID-19 testing should be directed to the Student Health Center COVID line (319) 273-2100, Monday-Friday, 8:00 am - 4:30 pm.

Students who have concerns about an underlying health condition(s) and the risks of attending classes, living in a residence hall, or any other aspect of the educational experience due to COVID-19 should consult with their health care provider. Please connect with Student Accessibility Services as soon as possible to discuss accommodations specific to your access needs.

Office of Compliance and Equity Management
Non-discrimination in Employment or Education
Content in this class has the potential to be disturbing to some individuals based on life experiences. If you ever feel the need to step out of the classroom or decline participation in an activity, please request an alternative learning experience.
UNI Policy 13.02 Discrimination, Harassment, and Sexual Misconduct states: "The University is committed to providing a workplace and educational environment, as well as other benefits, programs, and activities, that are free from discrimination and harassment based on a protected class, as well as retaliation."

Policy 13.02 outlines prohibited conduct and reporting processes. All University employees who are aware of or witness discrimination, harassment, sexual misconduct, or retaliation are required to promptly report to the Title IX Officer or Title IX Deputy Coordinator.

- Title IX Officer Leah Gutknecht, Assistant to the President for Compliance and Equity Management, 117 Gilchrist, 319.273.2846, leah.gutknecht@uni.edu
- Title IX deputy coordinator: Christina Roybal, Sr. Associate Athletic Director Athletics Administration, North DOME 319.273.2556, christina.roybal@uni.edu

If you or someone you know has been harassed or assaulted, you can find the appropriate resources at safety.uni.edu and equity.uni.edu. Resources that provide free, confidential counseling are also detailed at safety.uni.edu.

For additional information, contact the Office of Compliance and Equity Management, 117 Gilchrist Hall, 273-2846, equity@uni.edu.
